-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 6) ☐ Other: ____.

The information disclosure statement filed October 31, 2003 fails to completely comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. Specifically, copies of EP 1013633 and JP 08134034 were not received.

The abstract of the disclosure is objected to because it is not a single paragraph. Correction is required. See MPEP § 608.01(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakajima (EP 0122400), Ebisawa et al, and Ninomiya et al (GB 1297741) in view of Ledniczky et al (WO 99/04822) and Rayburn (WO 00/12067).

Nakajima discloses a sweetener composition comprising acesulfame K and an amino acid (see entire document).

Ebisawa et al disclose the crystallization of aspartame with amino acids (see entire document).

Art Unit: 1761

Ninomiya et al disclose the combination of saccharin and tryptophan (see entire document).

The claims differ as to the specific recitation of a salt.

Ledniczky et al disclose a salt of a sweetener where the salt provides beneficial organoleptic properties (see entire document).

Rayburn discloses a salt of saccharin for improved organoleptic properties (see entire document).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to produce a salt of any of the components of Nakajima, Ebisawa et al, and Ninomiya et al as taught by Ledniczky et al and Rayburn because the preparation of a salt of an intense sweetener improves the organoleptic properties of the sweetener.

Applicant is using well-known components for their art-recognized function. It is not seen where Applicant has established anything other than expected results. Applicant attaches no criticality to the claimed amounts and at most they are seen to be optimization, see *In re Boesch* 205 USPQ 215.

In the absence of unexpected results, it is not seen how the claimed invention differs from the teachings of the prior art. Applicant's claims are drawn to a combination of known components which produces expected results, see *In re Kerkhoven* 205 USPQ 1069 and *In re Gershon* 152 USPQ 602.

Art Unit: 1761
